PROJECTS

RestAPI for E-Commerce — *Java, Spring Boot, Spring DI, Spring Data JPA, REST API*

[Github](#)

- Developed a RESTful API for an e-commerce platform using Java, Spring Boot, Spring Data JPA, and Spring Dependency Injection (DI).
- Provided functionalities to manage products, categories, orders, and customers, facilitating seamless e-commerce operations.
- Focused on creating a scalable, maintainable, and high-performance backend system capable of efficiently handling typical CRUD (Create, Read, Update, Delete) operations.

Bank Management System — *Java, OOP*

[Github](#)

- Developed a comprehensive Bank Management System using Java and object-oriented programming (OOP) principles. This console-based application facilitates essential banking operations such as user registration, login, and balance inquiries.
- Highlighted skills in creating an intuitive user interface and ensuring secure data management, showcasing the ability to develop robust and user-friendly standalone applications.

Billing System — *HTML, CSS, Javascript*

[Live Github](#)

- Developed a standalone Billing System using HTML, CSS, and JavaScript. This web-based application allows users to create, manage, and generate invoices for various products and services, providing a comprehensive solution for handling billing operations.
- Demonstrated ability to create a fully functional web-based billing system using front-end technologies. Showcased skills in integrating HTML, CSS, and JavaScript to build a cohesive and interactive application.
